HERMIT CRAB

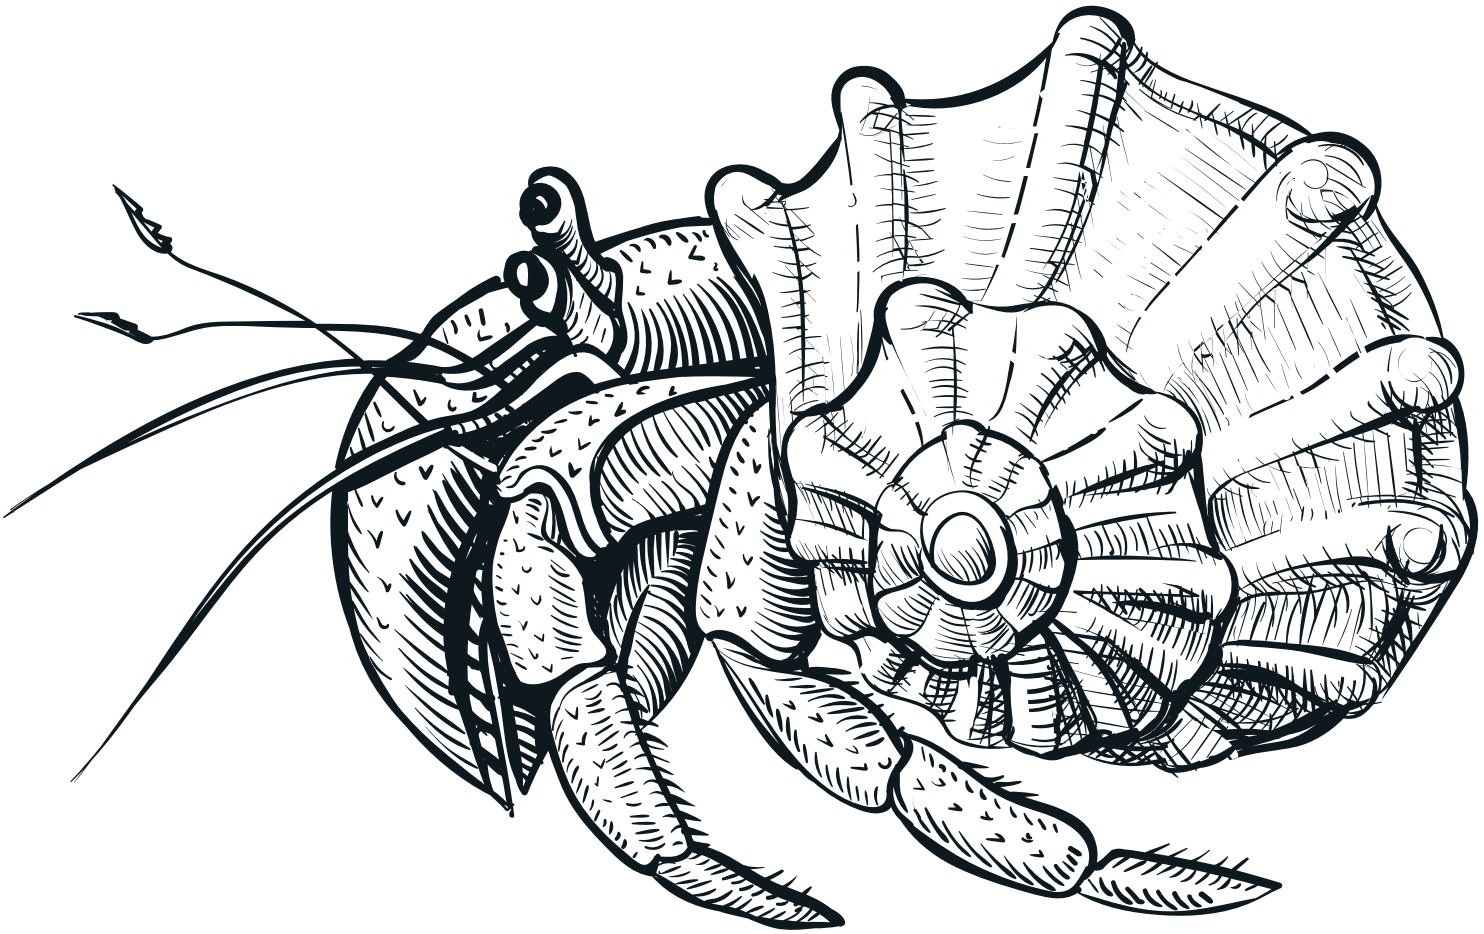

Emersyn Blake's Wondering:

Why do Hermit Crabs look furry?

What she found out:

Those small things that look like hairs are part of the exoskeleton called setae. The Hermit Crab uses them to sense what is nearby.

ESTUARY LIFE

How many creatures can you add to this estuary?

Emersyn Blake's Wondering:

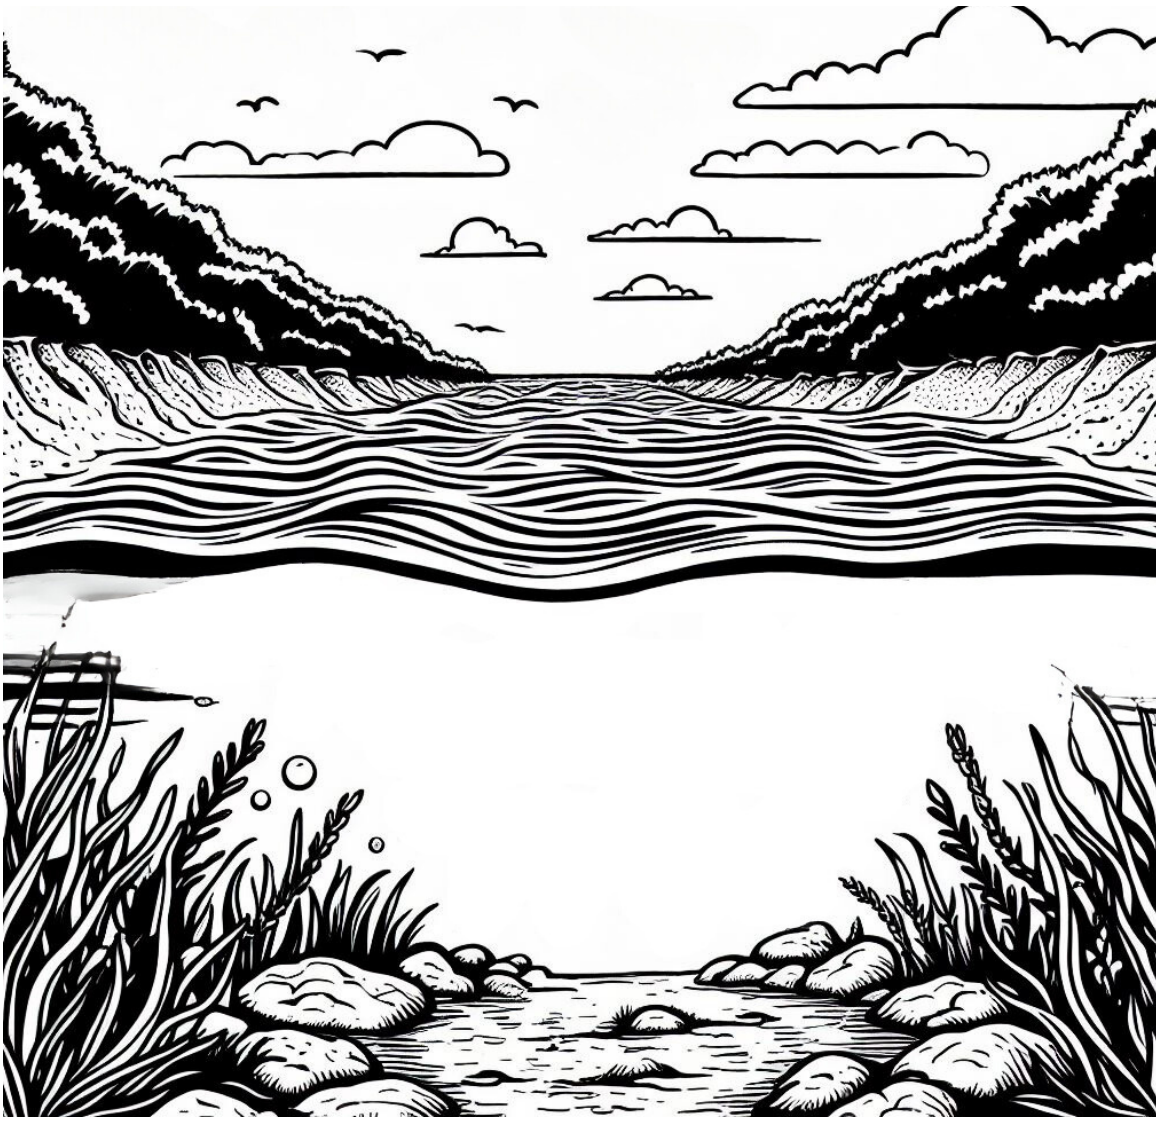

Why are estuaries important?

What she found out:

Many types of animals live in estuaries because it is a safe, calm place to raise their young.
